[Incentives]

Implementation of measures to provide incentives to Directors	Introduction of performance-based remuneration system, introduction of stock option system
---	--

Supplementary explanation Updated

- Stock option system
Stock options are awarded with the aims of further increasing motivation to make contributions to the Group's consolidated performance and boosting morale, as well as improving corporate value.

- Performance-based remuneration system
The Group decided to introduce Board Benefit Trust (BBT) during its 47th Annual General Meeting of Shareholders, held on June 18, 2015. This system has also been introduced at INFORMATION DEVELOPMENT CO., LTD., ID DATA CENTER MANAGEMENT CO., LTD., and DX CONSULTING CO., LTD., the Group's core subsidiaries.
Under this system, money contributed by the Group as funds is used to acquire Group shares through a trust. In principle, these shares are awarded to Officers upon their retirement in accordance with the Officer Stock Benefit Rules, a common set of rules established by the Boards of Directors of the Group and subsidiaries.
The introduction of this system further clarifies the interrelationship between Director remuneration and the Group's stock value. As with all shareholders, Directors not only benefit if the Group's stock price rises but also share the same risk of falling stock prices. This, therefore, helps raise awareness of the need to contribute to improving the Group's mid- to long-term performance and corporate value.
